microfiche. — (Research collections on the American West)

Summary: This collection reproduces histories and personal narratives of America’s westward migrations by covered wagon, on foot, and by stagecoach. The printed narratives and personal histories, drawn from materials printed between 1841 and 1930, are organized by trail, and within each trail section by author.

Accompanied by a printed guide entitled: A guide to the microfiche edition of the American West.

Western settlers created what we think of as the American West. Explorers came and went, soldiers came and went, miners and others came and went—but settlers came to stay. To bring the lives of the settlers into focus, consider the western land itself: the vastness, the boundless plain, and awesome mountain barriers. The Great Plains were a challenge to “Easterners” and European emigrants and the temperate Pacific coastal lands were considered the promised land.

For settlers, the ways of reaching a destination in the frontier country were either wretched ordeals or wondrous adventures. Fortunately, many of these men and women recorded daily events and their thoughts with such picturesque zest that some accounts of westward journeys have elements of great literature within them. At first they traveled in covered wagons, then by steamboats and stagecoaches. The coming of railroads increased the speed of the journeys, but for the emigrant travelers there was little in the way of amenities.

The saga of the covered-wagon migrations to Oregon and California is a familiar one. The overland emigrations of the 1840s to 1860s were enormously significant for our western and national history. “As long as new country with new hope lay between the settled Missouri and the beckoning Pacific, Americans were going to cross it.” This summed up the spirit that created the various emigrant roads or “trails.”

The reasons for heading West were as varied as the men and women the West attracted. Adventure drew some; the promise of fertile land or the hope of religious freedom impelled others. Very often the motive was gold fever or the expectation of profitable trade. This collection of printed narratives provides the researcher with a sense of the excitement rippling through a wagon train setting out from Independence, Missouri, for the distant foreign Dalles, or Salt Lake City, or Sutter’s Fort, or Santa Fe. These firsthand accounts allow the researcher to “stand in ruts worn deep in sandstone by iron-clad wheels endlessly turning” toward Oregon or California, or “trudge with tireless Mormons,” sternly disciplined in their religious zeal, “to their promised land.” The westward emigrants experienced suffering and hardship seemingly too great to endure; the “wordless hours...people too weary to even speak.” Many who attempted to cross the continent paid with their lives. Accidents and disease decimated wagon trains. Hostile Indians were a continuing threat along the many trails, particularly the Bozeman Trail.

By the 1860s the frontier line, the western rim of settlement, conformed roughly with the tier of states immediately beyond the Mississippi, with westward protrusions of settlement in eastern Nebraska and Kansas. West of this line was still a huge expanse of prairie land, the Great American Desert, and the Rockies, only thinly inhabited by white settlers, until reaching the Pacific Coast. The post–Civil War period was characterized by a tremendous growth in transportation facilities, industries, and desire for “going West to make a new life.” But this period saw the
steady decline in the use of the old westward trails. The travel by wagon of a
previous period now included travel by railroads and increased use of steamboats on
internal waterways. Settlers were attracted to the previously unsettled prairie and
mountain lands again, by gold and silver; by the short-grass pasture for cattle and
sheep (these could get to market very quickly by railroad, and was the impetus for
the railroads’ encouragement of western settlement); and finally by the plains’ sod
and the mountain meadowland that seemed suitable for farming and ranching. By
1890, the unsettled area of the West could no longer be delineated by a continuous
frontier line and so ended the westward migration (at least by wagon) of the
nineteenth century.

The Bozeman Trail
Montana-bound prospectors and settlers turned north from the Oregon Trail and
North Platte River, skirted the Bighorn Mountains, passed through the Crow Indian
hunting grounds, and then wound by way of the Yellowstone River and the Gallatin
Valley to Virginia City in Idaho. The Bozeman route offered dependable water and
abundant grass for livestock, but this trail was probably the most dangerous in terms
of Indian raids. By late 1866, three army forts guarded the trail in Indian country. The
heyday of this trail was brief: only 1864–1868.

Butterfield Stage Line Trail
The Butterfield Stage Line service began in 1858 to meet the needs of an ever-
growing population of the West. Having its eastern terminus in St. Louis, Missouri,
the Butterfield Stage carried mail, cargo, and passengers on a very circuitous route
ending in San Francisco, California. The trail wound through El Paso, Apache Pass,
Tucson, and Los Angeles. Many of the elements affecting westward moving wagon
trains, including weather, road hazards, Indians, and criminals, also threatened the
stage line. While the hardships experienced by the passengers paled against the
trailblazing of the earlier wagon trains, the threat of Indian attack led many a diarist to
tell of the haunting presence of Indians on the periphery of the trail. The Butterfield
Stage Line ended with the start of the Civil War, but the trail maintained its name and
importance for later generations of settlers.

The California Trail
Following the Oregon Trail from the Missouri River to the South Pass on the
Continental Divide in Wyoming, emigrants bound for California then branched out.
Some took a northern route via Fort Hall in Idaho, above the Great Salt Lake; others
ventured south around the Great Salt Lake. Whichever route they chose, the
emigrants sought the lifeline of the Humboldt River. This was the California Trail, or,
more accurately, a network of proven routes and misleading “short cuts.”

On the desert approaches to the Sierra Nevadas, the routes again diverged; but all
routes or “cut-offs” forced emigrants to face risks and endure severe hardships.
Even in their worst imaginings, emigrants could not suspect what was in store over
the next eight hundred miles. The remaining challenges of the Rockies, weeks of
plodding through loose sand, days of little or no water, nights of vigilance against
thieving and sometimes hostile Indians, and the backbreaking work of hauling
wagons across over seventy miles of the Sierra Nevadas, haunted by the fear of
early snows. Some would take the ordeal in stride; some later would even
romanticize it.
The Gila Trail
Westerly routes from Santa Fe and El Paso joined in Apache country to form the Gila Trail. Traversing the deserts of the southwestern frontier, it took a course determined by sources of water and passages through the mountains. Soldiers and settlers, miners and mail carriers, and freighters and outlaws traveled the trail beginning in the 1840s.

The Mormon Trail
Often following or paralleling routes blazed by earlier emigrants, the Mormon Trail stretched nearly fourteen hundred miles across prairies, sagebrush flats, and mountain barriers. From 1846 to 1869, this trail carried an estimated sixty thousand Mormons westward to Salt Lake City. In addition, a later trail, beginning in the southwest corner of the Utah territory, connected the various Mormon settlements in southwestern territories to the major temple at St. George.

The Oregon Trail
Blazed by fur traders and missionaries, the Oregon Trail remained in use from the early 1830s to the mid-1880s. In 1841, less than a hundred settlers, the Bidwell-Bartleson Expedition, followed the trail to the “Oregon Country,” an area in dispute between the United States and Great Britain. By 1847, the dispute was settled and emigration along the trail swelled to four thousand. Wagon trains rolled almost two thousand miles from the Missouri River to the Dalles settlement located along the Columbia River. With the trailblazing that led to the opening of the Barlow Road between Dalles and Oregon City, the extremely fertile and temperate Willamette Valley opened to settlement.

The Santa Fe Trail
Reaching from Missouri to New Mexico, more than nine hundred miles, the Santa Fe Trail cut across prairie, mountain, and desert. The trail endured for about sixty-one years, from its opening in 1821 until 1880, when the completion of the railroad to Santa Fe put it out of business. Travelers had a choice of two branches. The northern route angled through the Colorado Rockies, a difficult passage for wagons; the southern, or Cimarron cutoff, shortened the journey by a hundred miles but took emigrants far from reliable sources of water. Early in the trail’s history, it was recognized as a primary economic route to Mexican territory, carrying products and livestock.

The publication of these varied and scarce printed narratives of the various western trails provides the researcher a unique look into the trials and tribulations of those individuals who led the growth of the country westward from the Mississippi to the unknown domain of wild Indians, animals, geographic landforms, and climate. No one institution has all items related to westward expansion. This microfiche publication will both enhance and complement those institutions with few or no items. These histories provide an unparalleled opportunity to increase the knowledge of a crucial period in American history.
SOURCE NOTE

The books and pamphlets included in this microfiche publication have been collected and collated from a large number of source institutions. The source institution for each item has been listed in the Fiche Index, under each item by its Online Computer Library Catalog (OCLC) library code. A list of the institutional names and the OCLC symbols appears below.

EDITORIAL NOTE

The books and pamphlets collected for this publication have been microfiched in their entirety and were printed between 1841 and 1931. Every effort has been made to include the original edition of each item. Revised editions have been microfiched in lieu of original editions when necessary. In a very few cases both original editions and revised editions have been included. This has occurred when a large portion of the original has been revised significantly. Periodical literature, newspapers, broadsides, imprints, and unpublished manuscripts have not been included in this microfiche publication.

The primary bibliography consulted in selecting and organizing the publications in this collection was *The Trail West: A Bibliography-Index to Western American Trails, 1841–1869*. In addition, the following bibliographies were also consulted.

Following is a listing of the items in The American West: Overland Journeys, 1841–1880. Entries in this Fiche Index contain the following information: fiche number; author; document title; place of publication, publisher, and year of publication; number of pages; library location; and a listing of the Major Topics. Topics are listed in the order in which they appear on the fiche and only once per document.
